

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law. My house is much more quiet in the evenings then it used to be. I used to get around 10 calls each evening and now I only get 1 or 2 in a month. I work all day and when I get home at night the last thing I want is to get a bunch

of calls from telemarketers. The way the world is today, people need to relax and enjoy their time at home and we don't need to receive unwanted phone calls. Leave the Law the way it is.

Thank You
